

Assignment Date: 09/02/2026

Assignment Name: AI Around Me

AI Around Me — Daily Life Applications

- 1. Google Search**
Machine Learning ranks search results by learning from user searches and clicks to show the most relevant pages.
- 2. YouTube Recommendations**
ML studies watch history and viewing patterns to recommend videos you may like.
- 3. Instagram/Facebook Feed**
AI arranges posts based on your interaction such as likes, comments, and watch time.
- 4. Google Maps Navigation**
ML predicts traffic and best routes using real-time and historical travel data.
- 5. Voice Assistants (Google Assistant/Alexa/Siri)**
ML converts speech to text and understands commands using natural language processing.
- 6. Email Spam Filter**
ML detects spam emails by learning patterns from previously marked spam messages.
- 7. Online Shopping Recommendations**
AI suggests products based on browsing history and past purchases.
- 8. Netflix Recommendations**
ML recommends movies and shows based on viewing history and similar user preferences.
- 9. Face Unlock in Smartphones**
AI uses facial recognition models to identify the user securely.
- 10. Customer Support Chatbots**
AI chatbots understand user queries and provide automatic responses using NLP models.
